

# Xerox® DocuShare® Private Cloud Service

## Connectivity Overview

Xerox® DocuShare Private Cloud Service provides all the features and flexibility of Xerox® DocuShare® enterprise content management, with the added advantage of being hosted in our private cloud environment. Xerox managed data centers provide you with maximum security, privacy and redundancy. DocuShare Private Cloud can integrate seamlessly with your existing enterprise infrastructure, without exposing your network to risk. It's the ultimate combination of convenience and protection.

Xerox follows industry best practices in security processes, procedures, technology and physical measures to insure the safety and availability of our customer's data. Some of the key security factors are:

- Secure Data Center
- Encrypted User Authentication
- Internet Firewalls
- Network Address Translation and Proxy Services and Servers
- Secure Socket Layer (SSL) Data Encryption
- Redundant, Highly Available Routers and Switches
- Regular Vulnerability Scanning
- Redundant, Highly Available Power Management
- Highly Available Data Access via Redundant Circuits and Carriers
- Regularly Scheduled Backups, Offsite Storage and Site Replication
- Hardened Servers and Operating Systems
- Redundant, Highly Available, and Secure Servers
